

**ABSTRACT OF THE DISCLOSURE**

A plasma display apparatus includes a plurality of electrodes for electric discharge, and a drive circuit which drives the plurality of electrodes. The drive circuit includes first and second outputting circuits provided on a board, a connector provided on the board and coupled to the plurality of electrodes, and a conductive plate which is provided on the board, and provides electrical couplings between the first and second outputting circuits and the connector. The conductive plate includes a first area connected to the first outputting circuit and a second area connected to the second outputting circuit, the first area and the second area being substantially line-symmetric.
